Dear Parents and Carers,

You may have received messages about the new Teachers2Parents (T2P) App for Parents and Guardians. We have just started to explore this new feature and would like to let you more about the App.

The new App is an addition to the Teachers2parents text and email service that we currently use to send you texts, Newsletters and letters. Please rest assured that this will continue as before.

The new App, which can be downloaded, instantly syncs with T2P and gives easy access to all the text messages we have sent you.

In addition, there is a Noticeboard where we will post notices directly to the App noticeboard, including a weekly diary, important dates and upcoming events.

The other feature of this App is the Term Calendar which displays school term dates; we are informed that future updates to the app will also allow us to include events taking place in school.

To download this FREE App just follow the link and instructions that we have sent you or search for 'Teachers2Parents' in App Store or Play Store. It is available on Android and iOS.

When you open the App, your text messages will be displayed. To access the Noticeboard and Term Calendar, select the 3 horizontal lines icon in the top left of the screen and all the options will be displayed.

Just to reassure you that this App is an addition to text messages, Newsletters, letters and Website information so please do not feel any pressure to download the App if you don't want to. The App is still under development and hopefully future updates will improve it further. If you have any queries, please contact Julie Baskerville.
